

Important notice to investors regarding the value of units in Liontamer funds under the new tax rules

This year the way that tax on investments is calculated will change for many investors. We thought that this was a timely opportunity to remind you about the new rules and provide some further information about valuing your investment in Liontamer funds. However, for taxation advice relevant to your personal circumstances, we always recommend that you talk to your tax adviser.

If you hold Liontamer investments that you purchased *before* 1 April 2007, you may need to establish the market value of each such investment as at 1 April 2007 in order to calculate your tax liability for the 2007/08 income year. This is due to a change in the Foreign Investment Fund ("FIF") rules that came into effect from 1 April 2007.

Based on advice from our tax advisers, Bell Gully, it is reasonable to treat the market value of Liontamer units as a maximum of \$1.00, until maturity.

Due to transfer restrictions imposed on your units before maturity (described in the relevant offer documents) this is the maximum amount you could receive for your units prior to maturity, unless there are exceptional circumstances.

You will find a table of values for each fund as at 1 April 2007 and 1 April 2008 included with this letter. This table was prepared adopting the view that the value of the units cannot exceed \$1.00 before maturity. We have also included the annual distribution and shown the unit price of any funds which matured during the year.

Brief recap of taxation rules

Each Liontamer fund is an Australian unit trust which should be treated as a "foreign company" for New Zealand tax purposes, so the FIF rules may apply to your units in Liontamer funds.

The FIF rules will not apply to you if:

- the total cost of all your foreign investments is \$50,000 or less; and
- you are investing in your own capacity (i.e. not through a trust or company).

If the FIF rules do apply to your foreign investments you need to use an authorised calculation method to determine the taxable income from your units, such as the fair dividend rate (FDR) method, comparative value (CV) method (for individuals or trustees) or the cost method.

As examples:

- under the FDR method you would have taxable income each year of a total of 5% of the total market value of your foreign investments that are subject to the FIF rules at 1 April each year; or
- under the CV method, taxable income is the net gain in the market value of your investments over the year plus distributions received and net sale proceeds.

Individuals or trustees that choose to apply the CV method must do so on a portfolio basis for all investments subject to the FIF rules.

If you need further tax information about, for example, calculating the \$50,000 threshold or using an authorised calculation method and the rules around, and consequences of, using each method, refer to the offer documents for the investment you hold (available on our website www.liontamer.com) and consult your tax adviser.

Please note:

This summary does not apply to unitholders who hold 10% or more of the units issued in a particular fund or to unitholders who are not treated as being resident in New Zealand for tax purposes. Such unitholders are advised to obtain independent advice as to how their investment in the relevant fund will be taxed taking into account their specific circumstances.

The information in this update is general and is not intended as specific taxation advice. All investors should seek independent tax advice in relation to their own individual circumstances.

The Inland Revenue Department (IRD) has issued a determination on 22 January 2008 which allows investors in units of Liontamer trusts which meet certain criteria contained in the determination to adopt the FDR method. We believe that all existing Liontamer trusts satisfy these criteria, with the exception of GLOBAL Series 1 trust.

Determination does not apply to investments in GLOBAL Series 1 – Minimum Return Units:

The determination does not apply to investments in GLOBAL Series 1 minimum return units (MRUs). Investors in MRUs will be required to apply the CV method to investments in the MRUs from the beginning of the 2008 income year (generally 1 April 2007). The application of the CV method to your investment in MRUs will not prevent you from applying the FDR method to determine the taxable income from any other investments.

TABLE OF LIONTAMER FUND VALUES

Trust No.	Fund Name	Start Date	1/04/07 Market Value (\$/unit)	1/04/08 Market Value (\$/unit)	Annual return (\$/unit)	Maturity Date (if during 08 tax year)	Return at Maturity (\$/unit)
1	EASY Series 1	30/07/2003	\$1.00	\$1.00	\$0.01		
2	EASY Series 2	12/11/2003	\$1.00	\$1.00	\$0.01		
3	SUPER Series 1	12/11/2003	\$1.00	\$1.00	\$0.01		
4	EASY Series 3	11/02/2004	\$1.00	\$1.00	\$0.01		
5	SUPER Series 2	11/02/2004	\$1.00	\$1.00	\$0.01		
6	COMBI Series 1	1/04/2004	\$1.00	n/a	\$0.01	1/10/2007	\$3.27

17	COMBI Series 3 Booster Units	11/12/2006	\$1.00	\$1.00	\$0.0005		
18	BRICK Series 1 Base Units*	16/05/2007	n/a	n/a	\$0.0005		
18	BRICK Series 2 Booster Units*	16/05/2007	n/a	n/a	\$0.0005		
19	GLOBAL Series 3 Booster Units*	15/08/2007	n/a	n/a	\$0.0005		
19	GLOBAL Series 3 Super Booster Units*	15/08/2007	n/a	n/a	\$0.0005		
20	COMBI Series 4 Booster Units*	11/10/2007	n/a	n/a	\$0.0005		
21	WATER Series 1 Booster Units*	15/11/2007	n/a	n/a	\$0.0005		
21	WATER Series 1 Super-booster Units*	15/11/2007	n/a	n/a	\$0.0005		
22	TIGER Series 3 Booster Units*	17/10/2007	n/a	n/a	\$0.0005		
23	GLOBAL Series 4 Giga-booster Units*	9/01/2008	n/a	n/a	n/a		

*** GLOBAL Series 1 – Minimum Return Units:** please note that the Fair Dividend Rate (FDR) method of assessing tax is not applicable to these units. Investors will need to use the Comparative Value (CV) method. Under this method taxable income is the net gain in the market value over the year plus distributions received and net sale proceeds. Using CV will not prevent you from applying the FDR method to determine the taxable income from any other investments.

*** Trust 18 – 23:** these funds were launched after 1 April 2007 and therefore do not need to be included in calculations for the 2007/08 tax year.
